	:	
-----	X	

LORNA G. SCHOFIELD, District Judge:

WHEREAS, on September 6, 2022, and September 17, 2022, David Delorge mailed to the Court an affidavit asserting his Fifth Amendment right against self-incrimination and accompanying documents. The affidavit and accompanying documents are attached to this Order. It is hereby

ORDERED that each party may, but need not, file a letter as to the significance of the contents, if any. Such letters, not to exceed three pages, shall be filed no later than **October 14, 2022**.

Dated: October 5, 2022
New York, New York

LORNA G. SCHOFIELD

Case No.: 22 Civ. 2299 (LGS)

8 Plaintiff,

9 -against-

REPLY AFFIDAVIT

10 SAULREALISM LLC, ET AL.,,

11 Defendant
12
13
14

15 To the honorable LORNA G. SCHOFIELD, District Judge:
16

17 I, David J DeLorge, being duly sworn, hereby deposes and says:
18

19 Your Honor,

20 May it please you and this court, I am self-filing a REPLY AFFIDAVIT in conjunction with this
21 case. I no longer work for NETWORK DATA ROOMS, LLC, and humble request to be removed
22 from this case in all forms. I have felt harassed and hounded by this company over this case,
23 which lead to health issues.

24 As for the 'Email' in question, the 'Original Email thread is attached', for your review in
25 entirety.
26
27
28

REPLY AFFIDAVIT - 1

I did not give this email to any lawyers, and the information I provided NETWORK DATA ROOMS, is also attached.

I humbly, as given the option,
assert my Fifth Amendment right against self-incrimination,
as I was not in possession on this 'Evidence', nor do I know the
chain of custody it went through, as there were hundreds of emails and passed around.

I beg this court, to grant my pleas above and to allow me to step away from this case in entirety.

Thank you for your time, your Honor.

David J Delorge

David
Turn Ryan back on again.
This is her last chance. I told one more Terrorist hostage threat it's over. Thomas has friend VC firm that is going to help find a back end coder in C#. Can you send Thomas the language you used for indeed.
Thanks
Chris

Cc: Nicholas Fortuna <nfortuna@allynfortuna.com>
Subject: Re: SEE below : FW: Meeting today at 5pm 1.19.22

Just to clarify...couple of issues with the email below in regards to the timeline. 1. Everything went down on 1/18/22 not 1/17/22. Did you talk to her on the 17th about this? 2. You said 10:30am MST is when it all went down but it was at 1:30 MST and she deleted everything after that meeting went south and her last log in failed attempt was at 2:00:38 MST.

Timeline:

Tuesday Jan 17th, 2022 (8:45 am)

Ryan Saul Teams Messaged me she 'Had' to talk ASAP. She then Called my cell phone at 8:40 am telling me she was tired of Thomas not giving her a list to complete, that everyone is a dumb ass etc. She then asked me if to get "Them" (Thomas and Chris) upset, if she could delete the Dev Code and show them that she had them in a corner and they have to do what she wanted. I Vehemently told her #1. You cannot delete the code, #2. It's a breach of contract and a felony. She laughed it off, said she was playing and I told her I had to go, and hung up.

Tuesday Jan 17th, 2022 (9 am)

I was Teams Messaged by Chris Concannon to block Ryan Saul's access to Azure and Office 365. I immediately went into the system and blocked her access.
She at this time threatened to do something harmful.

Tuesday Jan 17th, 2022 (10:30 am)

@ approx. 10:30 am we had a meeting with Ryan – after I was told to re-enable her account, which I did. We were on a Teams call with her and she said she was tired of the BS and that they didn't and couldn't continue without her. Chris Concannon then explained that he was done dealing with her disrespect and threats. He told her she was no longer working on the project and was fired. Ryan Saul then hung up.
At that Time I was told to go block her account again and cut off her access. This process takes less hen a min to accomplish.

In that minute, Ryan Saul deleted all the tables from the Application DB and deleted the Web App itself and was trying to create a back door into the Network Security.

This had to be pre-staged and set up and ready for her to just run the query to delete the SQL DB tables and Delete the app.

Once I discovered what she had done, I began retrieving our Disaster Recovery backups and re-deploying the system. She has embedded re-write code in the DB on 1/18/2022 around 9:50 am and also removed all admin privileges to the web app. I was forced to retrieve a 'Good' copy of the application from Thursday Evening at 11:55 PM to restore it to working order.

Around 4:04 pm MST time Ryan Saul called my phone again. I answered and asked why she deleted these services. She laughed and said that they deserved it. I explained to her not to call my cell again and these actions are illegal. She said she was calling to ask me to be a reference. I then said again, do not call me, you have broken your NDA and I now need to fix everything. She then told me to tell Thomas and Chris she would fix it for them, if they still wanted her to continue to work. I hung up.

I have blocked, removed and added her IP's and location to our security blocks and am monitoring all activity, as this morning around 6am, she tried again to access the system.

Attached please find evidence and Logs of the above.

Notice Timeline and What happened. As I said, I did communicate what was happening. I also reached out in Teams and communicated.

See highlighted items.

That aside..

We need to ask the lawyers to allow us to ask for this.

"

We want the Deatable (dev-dealtable) code base , 'Complete' from Jan 16th, 2022 as the Repo in Deatable Azure Devops has not been updated since Sept 26, 2021.

We require access or a zip copy of the complete codebase. (Zip copy preferred).

"

We have everything else.

Please advise ASAP.

Thank you

Chris Concannon Yesterday 8:44 AM

STOP MAKING DEMANDS BECAUSE IT IS NO GOING WELL ON MY END. ITS GETTING VERY ANNOYING AND TRYING MY PATIENCE. IF IS NOT GOING TO LAST VERY LONG IF YOU KEEP UP THIS SHIT UP, IF YOU WANT TO QUIT JUST QUIT.

Chris Concannon Yesterday 8:58 AM

Ryan, Finish the software or I am asking David to find a new coder. We are not going to continue to work like this anymore. Your job is to make the changes we give and make them correctly and if you do not want to do this job anymore then tell me now because I am not going to play this game anymore of you trying to hold us hostage and tell us what you are going to do and not do. I want an answer now!!! If I don't get an answer from you in the next 10 minutes then you will be asked to leave this project. How does that sound. You have pushed me to my limit. You seem like a sensible person and you have worked had but you attitude is getting old now. So change or leave. There is no in-between. If I don't here from you I have you answer. Chris

Chris Concannon Yesterday 9:07 AM

You have two minutes to answer

Ryan Saul Yesterday 1:44 PM

You will not fix this problem by hiring another developer. You will now go find that the hard way. Call me back after you have done that.

Chris Concannon Yesterday 1:45 PM

Yu had your chance to do your work and stop complaining. Its over

Tuesday Jan 17th, 2022 (10:30 am)

Subject: Stolen Code and what we need

DealTable & NDR was set up with Microsoft Azure Devops and Azure Devops Source Code Repositories. We created a Secure, restricted access Repository for our code in December 2020.

This Code base was shared with our developers and they were directed to work from the repo and the repo only, and were provided a Virtual Desktop to work with the code and Software programs.

We also, up until August 2021 used the Azure Devops Repo Boards and Tasks to track code changes and accomplishments.

We then moved to only one developer, Ryan Saul, and it was more convenient to work off a running list in Teams and meetings.

As of Sept 26th, 2021, Ryan Saul stopped updating the "Real" new code to the repo, and occasionally just checked in the old code, to make it look like she was adhering to our code check-in rule.

She was not. She downloaded the code base, and was making changes to DealTable Code on a hidden, self owned repository in GitHub.

When she was let go, she did NOT check in the current code base.

We are currently trying to rebuild the code base as Ryan saul stole this, by developing the code and pushing it to our web app from her own repository. This was done intentionally and behind our backs. The left behind code base is from 9/26 and there are multiple add ins, connections, and even purchased Certificates missing from the left behind files she left.

What we need, ASAP, is the entire code base from 1/16/2022. She can either send it to us in a zip file or give us access to her hidden repo.

Without this code base, and all the missing connections and scrambled page connections, DealTable is left with weeks of re-compiling the code and trying to figure out all the broken pieces.

My recommendation is to have someone reach out and get the code and offer a deal to leave her alone with anything else if she complies.

DealTable used every security precaution and platform, including full backups, secure accessibility, Privileged Identity Management, DLP and Virtual Desktops for this development project.

This 'Theft' of code was don from the inside and pre-planned.

Without having someone check the code checking, details and lines, daily, there was no way to know this individual was doing what she was doing, at the time.

I am writing this from a hospital bed, waiting for another test as I woke up at 4:30 am this morning in the ER. This entire last 2 month, since Jan 18th has caused myself and others extreme stress. I literally spent almost 9 hours yesterday trying to re-compile the "Working" code pages to get DealTable at least back on the move and re-installing out Only Office add ins and software in our environment.

I am not sure at this moment what else to do but I again say this, this was an under-handed, planned act and against our security and policies.

Ryari Saul needs to give us the code base back from 1/16/2022 ASAP – as this is DealTabl's property.

Thank you

Subject: DealTable.com - Developer Malicious actions.

The following has been discovered in the 1 Min, 42 seconds it took to Lock our Ryan Saul.
 Only explanation is, she must have had Scripts, and Azure open and once was told she was OFF the project, began, intentionally, changing, deleting and making as much as a mess as possible.

Azure SQL DB (now restored) – all Tables and Data deleted. – We have Azure backuo- So everything has been restored.

The screenshot shows the Azure portal interface for a SQL database. The left sidebar contains navigation links for various Azure services. The main content area is titled 'SQL databases' and shows the details for 'D-DEVSQL-DEALTABLE-EUS-01'. The 'Query editor (preview)' tab is selected, displaying a query window with a table named 'Table1' and a query result showing a single row with the value '1'.

Case No.: 22 Civ. 2299 (LGS)

REPLY AFFIDAVIT

14
15 To the honorable LORNA G. SCHOFIELD, District Judge:

16
17 I, David J DeLorge, being duly sworn, hereby deposes and says:

18 Your Honor,

19 May it please you and this court, I am self-filing a REPLY AFFIDAVIT in conjunction with this
20 case. I no longer work for NETWORK DATA ROOMS, LLC, and humble request to be removed
21 from this case in all forms. I have felt harassed and hounded by this company over this case,
22 which lead to health issues.
23

24 As for the 'Email' in question, the 'Original Email thread is attached', for your review in
25 entirety.
26
27
28

REPLY AFFIDAVIT - 1

1
2 I did not give this email to any lawyers, and the information I provided NETWORK DATA
3 ROOMS, is also attached.
4

5 I humbly, as given the option,
6 **assert my Fifth Amendment right against self-incrimination,**
7 as I was not in possession on this 'Evidence', nor do I know the
8 chain of custody it went through, as there were hundreds of emails and passed around.
9

10 I beg this court, to grant my pleas above and to allow me to step away from this case in entirety.
11

12 Thank you for your time, your Honor.
13
